

MUHAMMAD SHOAIB

Full Stack Developer • Java Desktop Application Developer • DBMS

0308-6519867 | shoaib.arshad.se@gmail.com | Islamabad, Pakistan | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer and Java Desktop Application Developer with a perfect CGPA of 4.0/4.0. Specializes in end-to-end web application development using React.js, Node.js, and Express.js, alongside cloud-native databases (Firebase, Supabase, MongoDB, MySQL, MSSQL) and desktop application development with Java Swing/JavaFX. Combines strong HCI and UI/UX design principles with robust backend engineering and solid DBMS knowledge to deliver scalable, production-grade applications for real clients. Experienced in Agile teams, RESTful API design, and deploying live solutions with measurable business impact.

WORK EXPERIENCE

Full Stack Developer Intern | Developer Hub Corporation

Mar 2026 – May 2026 • Remote

Remote software company delivering web and SaaS products for international clients.

- ▶ Engineered production-ready React.js frontend features for 2 live platforms — E-Commerce and Prophecy Nexus — within a collaborative Agile team, delivering all sprint milestones on schedule.
- ▶ Built 2 full-stack UI modules: a real-time WebRTC video calling interface and an interactive calendar system, improving user workflow efficiency and engagement.
- ▶ Maintained 100% on-time feature delivery rate across all sprint cycles; awarded an official internship completion certificate upon completion.

PROJECTS

Farooq Agency — Medical Supply E-Commerce Platform

2026

Live: farooqagencies.com • Full-stack e-commerce solution built and deployed for a real Rawalpindi-based medical supply business.

- ▶ Architected a mobile-responsive e-commerce platform using React.js and Firebase Firestore, digitizing a traditional medical supply business and enabling online ordering for 50+ products.
- ▶ Built a secure admin portal with real-time CRUD for inventory, product variants, and order management using Firebase Authentication — eliminating manual stock tracking.
- ▶ Integrated WhatsApp Business API to automate customer inquiry routing and order notifications, significantly reducing manual response overhead.
- ▶ Deployed a serverless Firebase solution at farooqagencies.com with zero downtime since production launch.

SpendSmart — Full Stack Finance Tracker

2026

Live: spend-smart-expensemanager.vercel.app • End-to-end personal finance management app with real-time analytics, voice logging, and PDF reporting.

- ▶ Architected a full-stack finance tracker using React.js (Vite), Node.js, Express.js, and Microsoft SQL Server with real-time data synchronization across multiple concurrent browser sessions.
- ▶ Built a multi-view Recharts analytics dashboard with spending histograms, weekday vs. weekend breakdowns, and cumulative budget tracking for data-driven financial decisions.
- ▶ Implemented per-month budget scoping with carry-over logic, persistent DB-based push notifications, and voice-activated expense logging via Web Speech API.
- ▶ Designed a dark-mode-first UI following HCI and UI/UX principles; integrated automated PDF report generation for full financial summary exports.

E-Shop — Full Stack E-Commerce Platform

2025

Scalable e-commerce frontend with global state management and multi-step checkout flow.

- ▶ Built a fully responsive e-commerce UI in React.js with product listings, cart, wishlist, category filters, deals/offers, and a complete 4-step checkout flow with form validation.
- ▶ Managed global application state using React Context API (CartContext, AuthContext, WishlistContext) with system-wide light/dark ThemeContext switching.

- ▶ Designed reusable component architecture with clean separation of concerns for a scalable, maintainable codebase.

Smart School — Comprehensive School Management System

2025

Role-based desktop application actively deployed and running in a real school environment.

- ▶ Built a role-based desktop application (Admin / Teacher / Student) in Java Swing using OOP principles covering: attendance management, marks tracking, fee collection, salary payroll, and certificate & receipt generation.
- ▶ Implemented a Payroll & Finance module: automated teacher salary processing, school fee collection, and a full Profit/Loss analysis dashboard showing total income, expenses, and net balance — with detailed reporting.
- ▶ Integrated interactive data visualization using Java graphics (bar charts, pie charts, trend graphs) to display attendance analytics, fee collection summaries, and financial performance across terms.
- ▶ Built a Reporting System generating printable certificates, fee receipts, salary slips, and end-of-term academic reports with student-specific data.
- ▶ Implemented modular architecture with persistent data management — system is actively deployed and in daily operational use at a real school.

EDUCATION

BS Software Engineering | Riphah International University, Islamabad

Sep 2024 – Present

CGPA: 4.0 / 4.0 (Semester 4) • Relevant Coursework: Data Structures & Algorithms, OOP, Human-Computer Interaction, Requirements Engineering

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Recharts, Vite, Responsive Design

UI/UX & Design: Figma, HCI Principles, User Research, Wireframing, Prototyping, Usability Testing, Dark-Mode Design Systems

Backend: Node.js, Express.js, Firebase (Firestore, Auth, Hosting), Supabase

Desktop Development: Java Swing, JavaFX, OOP-based Desktop Applications, Role-Based GUI Systems

Databases & DBMS: MSSQL, MySQL, MongoDB, Firebase Firestore, Supabase, Oracle DB, ER Modeling, Schema Design, Query Optimization

Languages: JavaScript, Java, C++, C#, C

Tools & Workflow: Git, GitHub, Visual Studio Code, Figma, Postman, Agile / Scrum, Cisco Networking

CS Fundamentals: Data Structures, OOP Principles, Requirements Engineering, HCI, Modular Design

SOFT SKILLS

- ▶ Communication — Clearly articulates technical concepts to both developers and non-technical stakeholders; experienced in remote async communication across distributed teams.
- ▶ Team Collaboration — Comfortable working in Agile, cross-functional teams; proactive in stand-ups, code reviews, and sprint planning to keep projects on track.
- ▶ Problem Solving — Approaches complex technical challenges with structured critical thinking; able to debug, research, and deliver solutions independently under pressure.
- ▶ Adaptability — Quickly learns new frameworks, tools, and technologies; demonstrated by self-teaching Supabase, Firebase, and multiple DB systems across projects.
- ▶ Time Management — Consistently delivered production features on schedule during internship and client freelance projects without compromising quality.
- ▶ Client-Oriented Mindset — Translates real business needs into technical solutions; experience working directly with a business client (Farooq Agency) from requirements to deployment.

KEY ACHIEVEMENTS

- ▶ Deployed live production e-commerce platform for a real business client — farooqagencies.com (2026).
- ▶ Deployed SpendSmart as a full-stack live application on Vercel — spend-smart-expensemanager.vercel.app (2026).
- ▶ Smart School System actively running in a real school — real-world operational impact beyond coursework (2025).
- ▶ Internship Completion Certificate — Developer Hub Corporation (2026).
- ▶ Perfect CGPA 4.0 / 4.0 — Riphah International University, maintained across all semesters.
- ▶ Live Portfolio — shoaibarshad-seven.vercel.app
